

# SIDLEY LONDON REVOLUTION 2022 MARATHON TRAINING PLAN

Brought to you by:  
**THRESHOLD/  
MORE IS IN YOU™**

# INTRODUCTION

# MEET OUR COACH

Sometimes there can come a point in life when we are looking for something else; something to shake things up, something which gives us the opportunity to stretch ourselves, test ourselves, something that takes us out of the ordinary flow of life... That or you made a drunken bet which you are now being held to! Either way running events are perfect to have a new challenge and test yourself in a very different way.

I fell into the former category twenty years ago. It began with an endurance walk of 50 miles across Scotland. I trained hard, it wasn't always easy to fit sessions in around 4 tiny children, but I made it to the start line ready to give it my best shot – and I absolutely loved it! Fast forward 20 years, and I am now a competitive ultra runner taking on challenges for varying distances and I have had the good fortune of racing all around the world. So first a warning: beware, endurance events are hugely addictive, because, believe it or not, they are a lot of fun!

My experience from ultra walker to competitive ultra runner means that I can understand first-hand what it is like to take on the challenges. I have written the plan below to get you to the start line of Sidley London Revolution, fit and ready for the challenge ahead of you. It is easy to follow and will lead you by the hand, gradually building your endurance base and fitness over the course of 16 weeks.

If however you would like a more personalised plan I am also able to offer bespoke coaching. Being coached by me will allow you to have a plan which is tailor made to you and your specific life challenges, sporting ability and goals. The plan I write for you will be backed up with phone, email and text contact providing guidance, support, and motivation.

# INTRODUCTION

# THE 5 RULES

## THE KEY TO A HAPPY FINISHER

1	<b>Consistency</b> is key. Improvement happens when we do the activity repeatedly, but not in a stop/start fashion. Decide how much time is manageable for you on a weekly basis and stick to it.
2	<b>Rest</b> is when the transformation happens. We train to break our muscles down, it's when we rest that they rebuild stronger.
3	Don't neglect your <b>mental game</b> . Be aware of the sessions that made you stronger. When you went out and trained when you didn't want to, when you carried on and did another 3 km even though you had blisters. The day you finished your 9.5 km in the driving rain. All of these scenarios make you mentally more able to deal with them next time they arise.
4	Have the right <b>kit</b> . If you don't, it'll either be the reason you don't train or training will be uncomfortable and less enjoyable. Don't 'make do'.
5	Train in all <b>weathers</b> . You'll be fully prepared for what ever is thrown at you on the day itself.
<b>Don't forget:</b>	No one ever regrets having completed a training session but one often regrets missing one.

# INTRODUCTION

# TRAINING INTENSITIES

This plan assumes you can currently run 30 minutes without stopping. Pace isn't important at this stage, but 30 minutes should take you anywhere between 4 – 5 km.

The 12-week training plan is separated into three 4-week blocks. Each block contains 3 weeks where your training will build and increase, and the fourth week will be a recovery week. The final week of Block 3 will be a taper, ending with the marathon.

I said it before in the earlier section but it is worth saying again. Consistency is key to this training plan. Running two, three or four times per week on a regular, consistent basis will lead to huge gains, regardless of the pace and intensity of the session. So, make consistency your goal.

INTENSITY	DEFINITION
<b>Easy</b>	Conversational pace. Effort should not be taxing at all.
<b>Steady</b>	A little harder, but you should still be able to speak long sentences.
<b>Tempo</b>	This is 'uncomfortably comfortable'. You can speak a few words between breaths, but it's hard.
<b>Hills</b>	These feature in Block 2 and are written like this: 4x5 on 5'. This means complete 4 reps of running uphill for 5 minutes. Take 5 minutes rest as you descend between each hill. 3x6 on 3' means complete 3 hill repetitions of 6 minutes in length. Take 3 minutes rest between each. The uphill should be run at a steady to tempo effort.
<b>Long</b>	Use the long runs as practice for the marathon. Don't run them all at race pace, as that will be tough. Aim for somewhere between easy and steady pacing and use them to test your shoes and to try out different clothing. Make the effort to run on a mix of trails and road for race specificity.

# INTRODUCTION STRENGTH & CONDITIONING /RECOVERY

## STRENGTH AND CONDITIONING

Strength & Conditioning (S&C) is an important piece of the puzzle when it comes to training for a marathon but is often neglected. The first 8 weeks include S&C and it's worth making the effort to get these sessions in. A marathon, particularly the latter stages, is very much about strength rather than aerobic capacity, so building a strong foundation in the first half of the training plan will pay dividends in the second half of the plan, and in the race itself.

Each S & C session can be anywhere between 30 – 60 minutes. Include exercises that will develop running-specific muscles as well as your core and stabilizer muscles. The following types of session will help you to work on these areas.

### Running specific muscles

- Band workouts
- Circuit Training
- Kettlebell workouts
- TRX sessions
- Weight sessions

### Core work

- Plank
- Bird dog
- Mountain climbers
- Superman
- Russian twists
- Stability ball work

## RECOVERY

Finally, ensure you pay attention to your recovery after each session. To be able to train consistently your body needs the nutrition and rest required to build between each run. This means eating a balanced diet with plenty of protein, healthy fats, vegetables and healthy carbs (brown rice, pasta and bread, for example). It also needs good sleep and to be well hydrated.

# INTRODUCTION YOUR TRAINING BLOCKS

## DIVIDE YOUR TRAINING INTO MANAGEABLE BLOCKS

BLOCK	AIM
BLOCK 1	This block is all about consistency. Apart from a couple of steady runs, it's all very low intensity and designed to get you out the door. Go easy on yourself.
	If you struggle to get out, just put your shoes on and tell yourself to just do 5 minutes...chances are that after 5 minutes you'll finish the session.
	Do make the effort to include the strength sessions on a Thursday - they'll really pay dividends down the line.
BLOCK 2	As the kms rise, so does the specificity of training. Keep doing the easy runs, however short they are, as well as the strength sessions.
	Tempo runs are a great way to push your aerobic system a little harder. They should be "comfortably uncomfortable" efforts with relatively little rest.
	Saturday runs are now steady, so focus on pace a little more than in Block 1. Steady should still feel comfortable - no hero efforts required.
	Hill sessions make an appearance. Find a hill that's between 3 - 5% (nothing too steep) or use a treadmill if you don't have access to a hill. Aim to keep the effort level steady to tempo as you run up, and take it very slow coming back down to recover.
BLOCK 3	In these final couple of weeks of training at the beginning of Block 3, we're not looking to do anything massive. Just keep consistently nailing those hill and speed sessions and really focus on that big 30 km- it's perfect race practice.
	After the 30 km, it all starts to wind down. Don't get slack though - you've done so well to get here, you don't want to skip sessions at this stage. Although all the fitness has been gained, ensuring you complete these last few sessions will be good for you mentally.
	Really focus on keeping off your feet and eating a healthy, balanced diet. Make sure you have all your kit together the week before the event, so you have a couple of days to buy any last minute bits.

# THE PLAN

# BLOCK 1

WEEK	MON	TUES	WED	THUR	FRI	SAT	SUN	✓
1	Easy 5km	REST	Easy 5km	S&C	REST	Easy 8km	REST	
2	Easy 5km	REST	Easy 6.5km	S&C	REST	Easy 9.5km	REST	
3	Easy 5km	REST	Easy 5km	S&C	REST	Easy 11km	Easy 5km	
4	REST	Easy 5km	Steady 5km	S&C	REST	Easy 5km	REST	

## THINGS TO THINK ABOUT

WEEK		KM
1	This week is all about getting out there and taking the first steps on your journey to becoming a marathon runner. Ensure each run is super-easy. You should be able to hold a conversation if you're running with someone. Focus on being consistent.	18km
2	Another week of gradual build, with 9.5 km this weekend. If you want to incorporate a Parkrun into your Saturday run then go for it - just keep it all nice and easy paced.	21km
3	Another solid week banked. If the distances don't seem too great at the moment, remember that it's all about consistency at this stage. Tick all four runs. Easy week next week before we enter Block 2.	26km
4	Well done on completing your first block! Enjoy some down time, both physical and mental. Include one steady 5km run this week to help keep the legs turning over.	15km

# THE PLAN BLOCK 2

WEEK	MON	TUES	WED	THUR	FRI	SAT	SUN	✓
5	REST	Easy 5km	S&C	Tempo 5km 2x5 on 4'	REST	Steady 11km	Easy 9.5km	
6	REST	Easy 6.5km	S&C	Tempo 6.5km 2x10 on 5'	REST	Steady 16km	Easy 8km	
7	REST	Hills 5km 4x5 on 5'	Easy 8km	Speed 6.5km 8x400m on 90s	S&C	REST	Long 24km	
8	REST	Hills 5km 3x8 on 4'	S&C	Tempo 9.5km 3x10 on 2'	REST	Steady 9.5km	REST	

## THINGS TO THINK ABOUT

WEEK		KM
5	As we start Block 2, I hope you enjoy the first tempo session on Thursday. If possible, complete this session with friends - it's much more enjoyable! Remember to get out even when you don't want to, consistency is key.	30.5km
6	Make the tempo and steady runs your focus this week, but don't let the easy runs slip. We're getting into the meat of the training plan now, and every session counts.	37km
7	Here we go, just over half way through the plan and it's time to hit your first half marathon! If you can do this at an official event, then that'd be ideal. If not, make an adventure of it and perhaps try to get a friend to run some or all of it with you. After a hill, speed and easy run during the week, completing a half marathon this weekend is no mean feat. Well done!	43.5km
8	Here we come to the end of Block 2 with a nice easy week. Rest well this week - next week is a long one.	24km

# THE PLAN BLOCK 3

WEEK	MON	TUES	WED	THUR	FRI	SAT	SUN	✓
9	REST	Hills 5km 5x5 on 2'	Easy 8km	Speed 6.5km 6x800m on 2'	REST	Long 30km	REST	
10	REST	REST	Easy 9.5km	Speed 8km 4x1000m on 2'	REST	Long 16km	Easy 9.5km	
11	REST	Easy 9.5km	S&C	Easy 5km	REST	REST	Easy 3km	
12	REST	Easy 3km	REST	Easy 3km	REST	<b>EVENT DAY!</b>	<b>RELAX &amp; REVEL!</b>	

## THINGS TO THINK ABOUT

WEEK		KM
9	If you can run 30km, you can run 42km in a race. Treat this as a real practice: use the same equipment, fuel and pacing strategy you intend on using in the race. Choose a route that uses a mix of trail and road.	<b>49.5km</b>
10	Put into practice the changes made after last weekend's test- run in terms of nutrition and shoe / clothing choices. Huge congrats for getting here...the hard work has been done.	<b>43km</b>
11	Be sure to complete each at very easy effort, but include 5-10 x 60s at marathon pace just to stretch the legs out. Nothing too hard - it's all about getting your body feeling rested and prepared next week.	<b>17.5km</b>
12	It's easy to think carb-loading and moving as little as possible is the best plan of action in the last week, but it lulls your body into a false sense of security! Make sure you fuel well, but do get out for the run on the day before the race. Take it very slow and include 5 x 30s strides - short pick ups to stretch your legs out.	<b>48km</b>
